

There's a storm brewing in the shipping industry. Are your profits safe?

Brace yourself for January 2015.

That's when the global giants' new dimensional pricing structure will hit you. For the first time, you'll be charged for the size of **all** your packages, not just the weight. So if you ship packages larger than just $\frac{1}{2}$ a cubic foot, you'll probably need a new shipping solution. Regional carriers like LSO can keep you protected. Call Andrae Mack today at **1.800.800.8984**. We're here to help you find the right solution for your business.

 **LSO**
It's all in the delivery.
